SUITECOMMERCE DEVELOPMENT SERVICES

Folio3 is a California based, SuiteCommerce Certified Digital Agency that specializes in NetSuite eCommerce solutions (SuiteCommerce Advanced, SuiteCommerce, Site Builder, and SuiteCommerce InStore).

We provide end to end SuiteCommerce development services to NetSuite customers, ranging from web store design and implementation to UI and functionality customization, performance optimization, integrations and support. Whether you want to implement a brand new SuiteCommerce website, migrate an existing Site Builder based storefront to SuiteCommerce or SuiteCommerce Advanced, or just want to update the look and feel of your current SuiteCommerce web store, we can help you do so.

With over 13 years of web & mobile design expertise, we know how to make your business look good. We'll help you create a SuiteCommerce storefront that's unique, responsive, graphically appealing, and customized in accordance with your needs.

SOME OF OUR CLIENTS

electroCore

WHY FOLIO3

SuiteCommerce Advanced and SuiteCommerce InStore Certified Digital Agency.

Team of **130+** NetSuite Developers, Architects, and Project Managers.

Hybrid onshore/offshore development model offers cost & time efficient delivery.

SOME OF OUR WORK

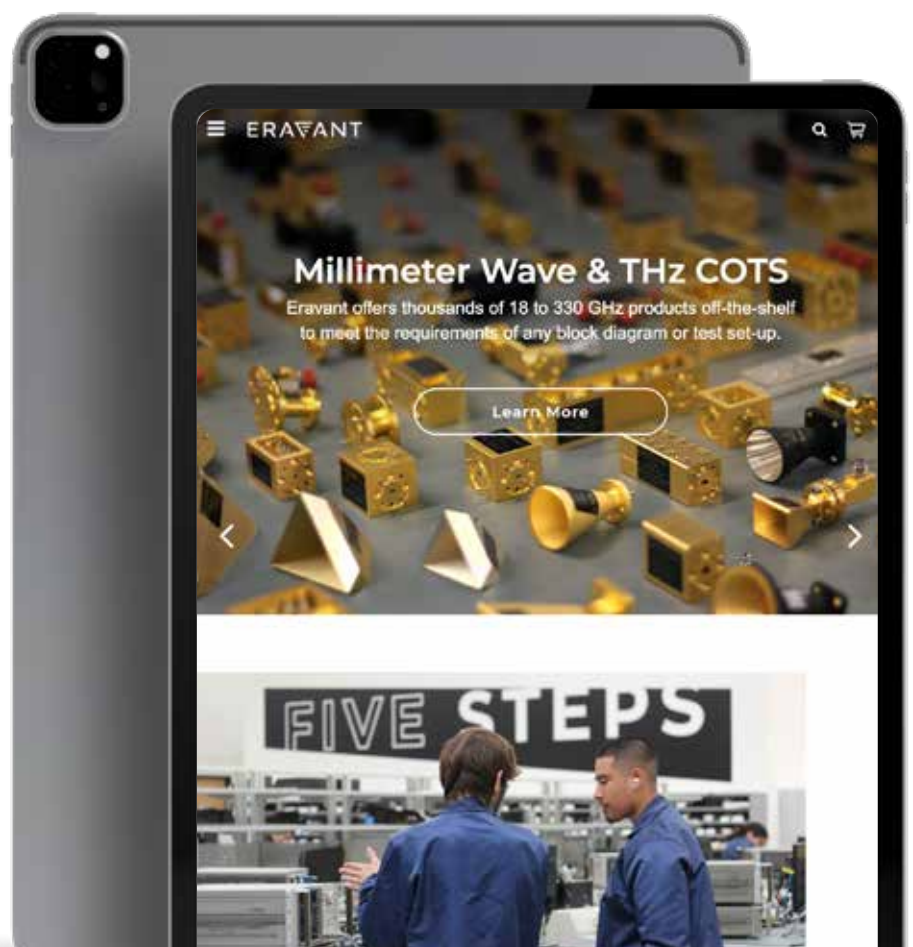

ERAVANT

Eravant (formerly Sage Millimeter, Inc.) is a woman owned, and ITAR-registered company focused on developing high performance microwave and millimeter-wave components and subassemblies for commercial and military applications.

Folio3 designed and developed their new B2B website using the SuiteCommerce Advanced Platform, thereby ensuring seamless integration between their ecommerce storefront and their NetSuite back office.

Folio3 also implemented a number of customizations to their SuiteCommerce web store, to add functionality not supported in SuiteCommerce Advanced by default. These included features such as:

- Call for Pricing.
- Custom order tracking workflow.
- The ability for international customers to upload attachments along with the order.
- Moderated sign-up process.
- Ability to upload attachments on the Product Details Page.

SOME OF OUR WORK

DOUBLE RADIUS

Double Radius is a US based distributor of wired, wireless, and hybrid network equipment and accessories. Folio3 migrated their Site Builder based site to SuiteCommerce along with a brand new design (via a custom theme) and intuitive user interface.

Folio3 also customized SuiteCommerce to add functionality not supported out of the box, such as:

- Facebook Pixel integration
- Display of ship-from location and estimated shipping time (for each item) on checkout
- Custom fields for SuitePromotions
- Display of PO numbers in order history in the My Account section
- Customized Product Details Page with additional item info fields and attachments (product specification docs)

With Folio3's efforts, Double Radius was able to revamp their web store using SuiteCommerce, which enhanced the site's functionality and user experience, while ensuring seamless integration with the NetSuite ERP.
