ORACLE NETSUITE INTEGRATIONS NETSUITES

Seamlessly integrate NetSuite with your favorite Marketplace, Ecommerce Platform, CRM, Third-party logistics, Trading Partner or Payment Processor.

Folio3 specializes in NetSuite integration solutions. Whether you're looking for an integration between NetSuite and your eCommerce platform, online marketplace, CRM, 3PL or any other third party system, we can help you.

Our NetSuite Connectors are all native SuiteApps and are specifically designed to help you get the most value out of your Oracle NetSuite ERP, by providing automated front and back-office data synchronization; helping save both time and cost while eliminating data entry errors.

HEAR FROM OUR CLIENTS

JAWWAD RASHID
Management Accountant

Folio3 was well experienced and super helpful in tackling tough issues as and when they arose. The team was great at setting up the integration as we required and also very understanding when issues were flagged. They did an excellent job with making the final tweaks & ensuring all complications were promptly dealt with. Folio3 was great at listening to our requirements & customizing the connectors to best reflect these.

NELSON ARBELAEZ
IT Manager

ARGCO Magento 2 connector was a complex project, with around 20 customizations. The entire team gave quality work to fulfill all the requirements & it was a critical Go-Live as we were migrating from Magento 1 to Magento 2. The project team was able to successfully put all the pieces together & absolutely nailed it!

MADISON HORNIG
Marketing Department Manager

This was my favorite Folio3 project to work through so far. Folio3 was extremely communicative and able to solve all of my problems and requests. The team launched the connector on to production very smoothly. We only hit one error after launch but the Folio3 team worked this problem out very quickly behind the scenes. I am very happy with the project and end result and look forward to BioSkin's next project with Folio3.

ELYSSA MCGREGOR
IT Manager

I want to thank Folio3 for a fabulous job on configuring the NetSuite connector (integration) as we migrated from Magento 1 to Magento 2. The Folio3 team went above and beyond to make sure that the NetSuite integration was working as we went live with our new website & did not stop until all was completed & to our satisfaction.
