End-to-end Apparel Production Solution for NetSuite

NetSuite For Apparel, Footwear And Accessories

The Apparel, Footwear, and Accessories (AFA) industry is rapidly evolving due to changing consumer preferences, and staying competitive in this fast-moving market is essential to growth. To do so, companies must be equipped with the right technological tools.

There is a notable shift for fast-growing AFA companies, who were previously using QuickBooks and Excel spreadsheets and have on-premises systems to manage their operations, towards NetSuite. NetSuite's unified cloud-based ERP platform streamlines front and back office operations end-to-end and gives a single version of truth across the organization.

Folio3, An Award Winning NetSuite Alliance Partner

Folio3 has been a trusted NetSuite Alliance Partner for more than 18 years and specializes in helping businesses in the Apparel, Footwear, and Accessories (AFA) industry.

Folio3 has successfully delivered numerous implementations and helped companies switch to NetSuite, with a stellar track record in NetSuite SuiteSuccess implementation.

Innovation Through Adversity

With a deep understanding of both NetSuite and key industry challenges Folio3 played a pivotal role by developing a custom solution for the manufacturing process for AFA businesses.

Folio3 combined NetSuite's powerful ERP capabilities with tailored workflows for AFA businesses by developing NSTitch which simplifies the manufacturing and production lifecycle processes.

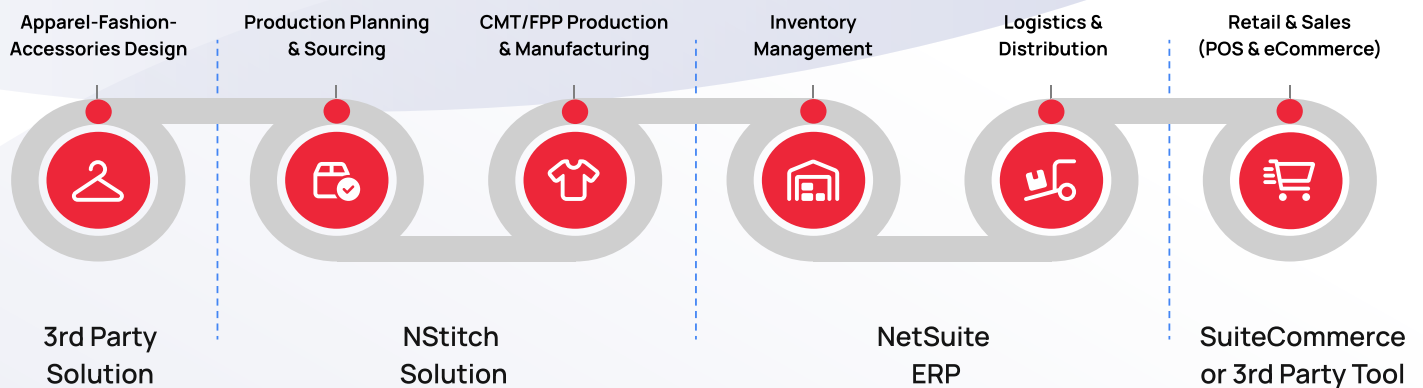

Simplify AFA Production with NSTitch

A custom-tailored apparel manufacturing solution, built on top of NetSuite ERP to simplify AFA production processes with comprehensive tracking and management.

With NSTitch you can track various stages of in-house and outsourced production processes, and get full visibility and control across different functions.

AFA Value Chain

Folio3's NSTitch, integrated with Oracle NetSuite, focuses on the Cut-Make-Trim (CMT) process in the Apparel-Fashion-Accessories (AFA) value chain. It supports Full Package Production (FPP), allowing brands to outsource manufacturing and concentrate on design and distribution.

Do you encounter challenges in your apparel and fashion business such as:

- > Material wastages
- > High production cost
- > Lack of transparency
- > Dashboard & Reporting
- > Inaccurate material planning
- > Lack of control and visibility on production processes
- > Manage outsourced vendors and external suppliers
- > Track and manage production stages such as cutting, stitching, embroidery, etc

With NStitch You Can:

- > Get full control and visibility of production processes
- > Easily track production stages
- > Generate comprehensive reports
- > Efficiently track wastages and damages

Key Features

- > Re-Work Order
- > Purchase Order
- > Cost Tracking
- > Custom Reports
- > Order Cancellations
- > Finished Product Costing
- > Transfer Orders for Raw Materials
- > Components' Consumption Tracking
- > Make to Order / Make to Stock
- > Sub-assembly Production Order

Add Ons:

- > Lot control
- > Repair Functionality
- > Full-packaged Outsourced Production

Who Can Benefit From NStitch Solution?

Any apparel and fashion businesses facing challenges in planning the inventory of raw materials, managing production processes, cost tracking, and analysis, can take full leverage from Folio3's custom-tailored ERP solution.
